

# How to sell

Dear retailer,

paysafecard is a global leading prepaid payment product that allows customers to pay online - simple, private and secure with cash.

Customers can pay in thousands of online shops for their games or other internet services, by simply entering a 16-digit paysafecard prepaid code, without a bank account or credit card.

## And selling paysafecard is really straightforward, just follow these three easy steps:

1. A customer asks to buy a paysafecard prepaid code in one of the available amounts.

2. Simply print the code via the menu options for prepaid products.

3. After the customer has paid, hand over the paysafecard prepaid code to the customer.

## One thing to keep in mind:

The prepaid code is as safe and as practical as cash – and also as valuable. So, never pass on a 16-digit paysafecard prepaid code over the phone.

Please reach out to [distributors@paysafecard.com](mailto:distributors@paysafecard.com) if you have any questions.
