

## Dear retailer,

Selling paysafecard is incredibly straightforward! paysafecard is a tried and tested payment method that allows customers to pay safely and simply online - as if they were using cash.

You can quickly and conveniently generate paysafecard vouchers at your sales till or terminal in the same area as other prepaid payment methods, mobile cards and prepaid products.

A paysafecard voucher is as safe and practical as cash - and just as valuable! For this reason, you should never pass on the 16-digit PIN over the phone.

**paysafecard**

Date: 28.02.2013 Time: 09:03:04  
Term-Nr.: 987654 Trace no.: 123456  
TXN: 00000000123456789  
Invoice no.:

**Amount: 10.00 CAD**

Serial number: 000000123456789

**PIN:**  
0000 0000 0000 0000

Download the paysafecard App and scan this QR Code to check your balance or to upload the PIN in your "my paysafecard" account.

**PIN = CASH! NEVER DISCLOSE  
A PIN OVER THE PHONE.**

Pay online  
- Select paysafecard when paying in a webshop.  
- Simply enter the 16-digit PIN - ready!

Warning: Never pay with paysafecard to unlock your computer or to claim an alleged competition prize. Find out more: [www.paysafecard.com/security](http://www.paysafecard.com/security)

Help  
[www.paysafecard.com/help](http://www.paysafecard.com/help)

paysafecard is a payment method issued and managed by Prepaid Services Company Ltd.

See [www.paysafecard.com](http://www.paysafecard.com) for the applicable general terms and conditions.

## Selling paysafecard is simple

A customer asks to buy paysafecard in a certain amount.

You print out paysafecard via the familiar menu option for prepaid products, such as for telephony and other payment methods.

You hand over the voucher printout once the customer has paid.
